

RR Kabel Marks Five Years of Strengthening Its Commercial Lighting Business Through Arraystorm

Delivering intelligent, energy-efficient designer lighting for India's evolving commercial, industrial and infrastructure landscape

Mumbai, September 07, 2026: RR Kabel, one of India's leading manufacturers of wires, cables and electrical solutions, marked five years of strengthening its commercial lighting business through Arraystorm, reaffirming the Company's long-term commitment to delivering intelligent, energy-efficient lighting solutions for commercial, industrial and infrastructure projects across India.

Arraystorm by RR Kabel offers integrated lighting solutions across offices, warehouses, factories, healthcare facilities, educational institutions, retail spaces, hospitality projects and outdoor infrastructure. The portfolio includes commercial luminaires, architectural lighting, industrial high bays, warehouse lighting, cleanroom fixtures, outdoor lighting and specialised project solutions. It has also introduced India's first programmable DC Lighting Engine with DC Sensors and LMS Controls, enabling power and control through a single wire. This innovation delivers enhanced safety by eliminating electrical shocks and reducing lighting-related fire risks, while enabling up to 40% lower copper usage, remote maintenance and fully dimmable lighting controls.

Supporting these capabilities, RR Kabel established a state-of-the-art manufacturing facility in Bengaluru in 2024, featuring an in-house laboratory for testing B2B products and expanding its manufacturing capacity fivefold to meet the growing demand across segments.

Over the past five years, RR Kabel has steadily expanded Arraystorm's footprint, strengthening its manufacturing capabilities, research expertise and intelligent lighting technologies to build a strong foundation in the commercial lighting segment. During this period, the Company expanded its operations from a presence limited to South India to establishing a pan-India sales network, with teams based in Bengaluru, Chennai, Hyderabad, Mumbai, Pune, Ahmedabad, Vadodara, Surat, Delhi, Lucknow, Chandigarh and Kolkata, serving customers across the country.

The portfolio has also evolved from an indoor commercial lighting range to a comprehensive offering spanning industrial, healthcare, education, retail, landscape and façade lighting solutions, all developed by RR Kabel's in-house design team.

Commenting on the milestone, **Mr. Pradyoth Varma, COO - Arraystorm Lighting Division, RR Kabel**, said, *"The past few years have been instrumental in strengthening our commercial lighting business and expanding our ability to serve India's evolving infrastructure landscape. Through Arraystorm, we have combined engineering excellence, innovation and manufacturing capabilities to build a comprehensive portfolio of intelligent lighting solutions that address the needs of commercial, industrial and institutional customers. As infrastructure development, industrial growth and sustainability continue to shape India's growth story, we remain focused on investing in innovation and delivering future-ready lighting solutions that create long-term value for our customers and partners."*

About RR Kabel:

[R R Kabel Limited](#) is a leading consumer electrical company in India and has an operating history of over 26 years in the country. A globally respected conglomerate, with a presence in over 66 countries, RR Kabel is India's largest exporter of wires and cables, offering a wide range of electrical products including wires & cables, fans, lighting, electrical accessories, and appliances for residential, commercial, industrial, and infrastructural purposes. Committed to quality and innovation, the company's products adhere to global guidelines and standards, ensuring safety and reliability.

The Company continues its mission to create quality products using the latest advances in wire design and engineering. The range of wires and cables have national & international product certifications and are compliant with the REACH (Registration, Evaluation, and Authorization of Chemical Substances) and RoHS (Restriction of Hazardous Substances) directives. The brand has also conducted extensive research and development to ensure its products adhere to global guidelines and standards.
